

NEW! ANNOTATED
BOOK OF MORMON

2ND EDITION CHANGES BY
RODNEY L. MELDRUM ~ DAVID R. HOCKING

There are a few differences between the 1st edition and the new 2nd edition, but I'd say it is about 90-95% the same. Obviously, the Book of Mormon text is the same, with only a couple minor corrections.

Page numbers are the same up to page 542, which is in the additional insights' materials after the actual text.

There are new pages with the following additional information.

- 1- Pages 542-543 on keystones, the Hill Cumorah and Jerusalem.
- 2- Pages 560-561 on the use of the Urim and Thummim as the primary instrument of translation of the gold plates into English.
- 3- Pages 563-564 lays out the changes made by the church from the 1920 edition to the 1981 edition.
- 4- There are a few additional words added to the index at the back.
- 5- Several of the pages within this edition have been redesigned or rewritten to enhance the visual layout add clarity, or make the wording flow better, but no major changes to content.
- 6- The colors were muted somewhat to give it a more classical or authoritative look and feel more akin to older editions of the Bible.
- 7- Finally, the front cover was redesigned using a different font and flourishes to differentiate this edition from prior editions put out by the church.

That well sums up the differences. I hope this helps. Thank you for your interest in Annotated Edition of the Book of Mormon. Your brother in the gospel and in truth,

Rod Meldrum
